

**EMPOWERING COMMUNITIES.
CHANGING LIVELIHOODS.**

WHO ARE WE?

Footsteps Bangladesh, founded in 2013, is a next-generation organization which designs and implements programs and social ventures which not only addresses community challenges but also uses the solutions to build community capacity in sustaining the solution in the long run without further donor support. The organization is on a mission in building resilient communities across Bangladesh.

WHAT DO WE DO?

Footsteps mainly focus on three aspects:

1.Program Development: This aspect is mainly dedicated to creating and implementing programs that take a unique and sustainable approach to solving a major social challenge existing within our communities.

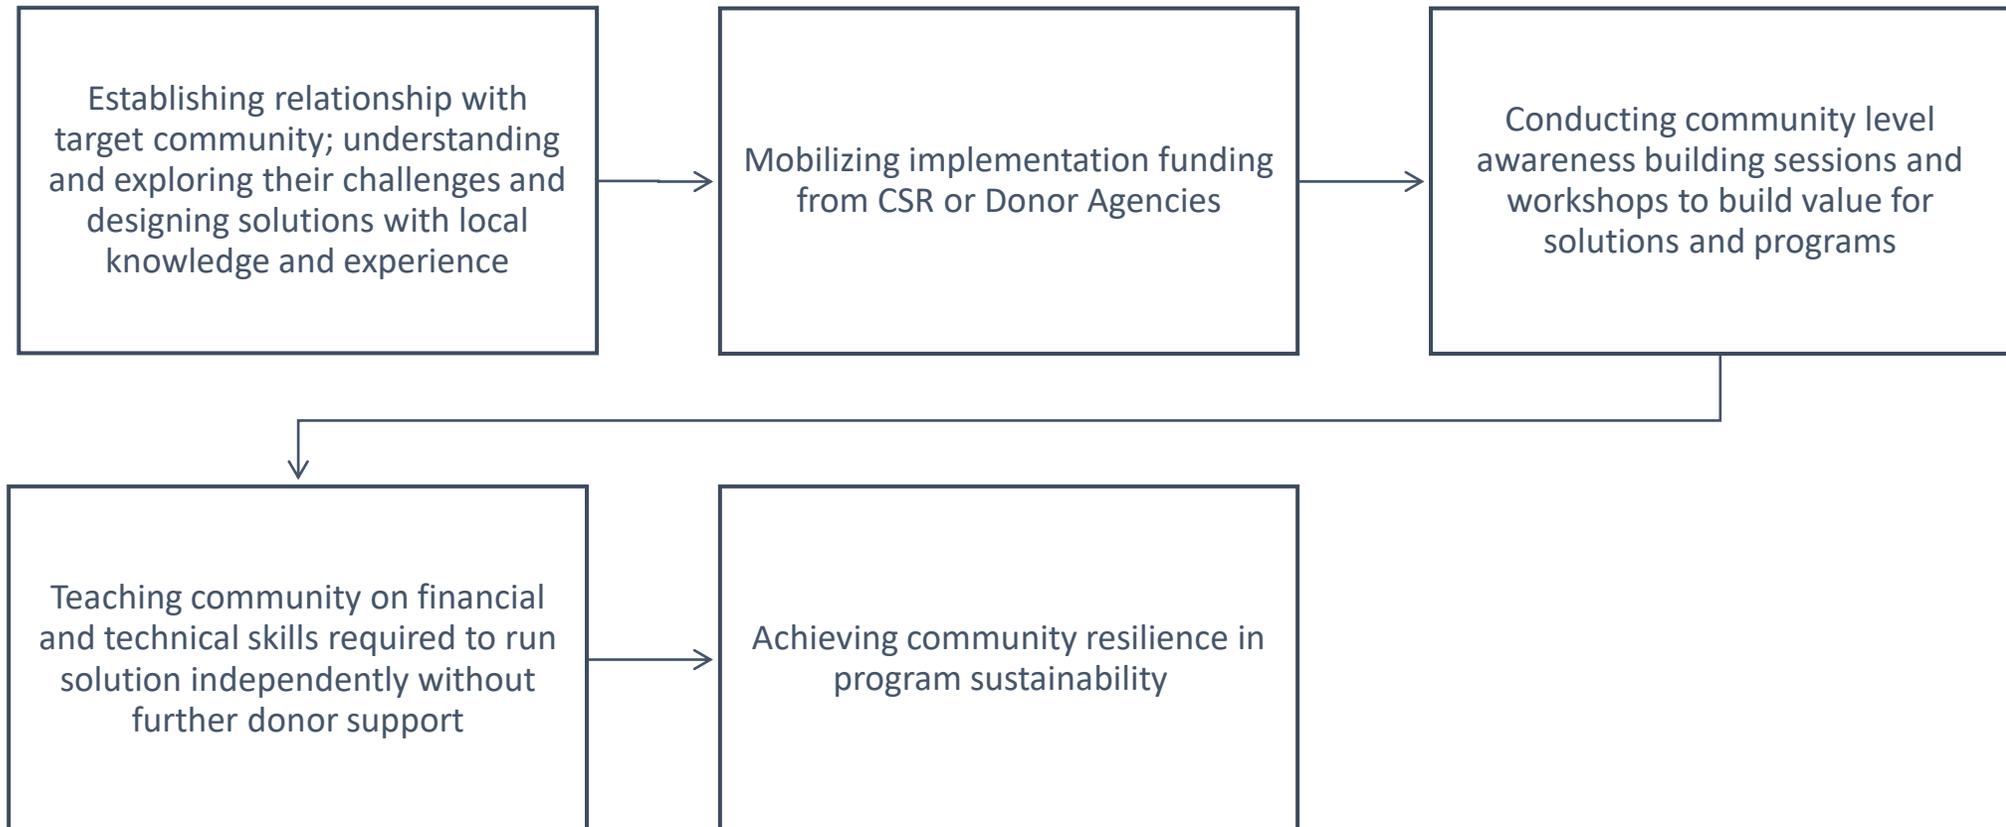

2.Changemaker Development: This aspect utilizes the large pool of youth and turns them into responsible citizens through skill development, who take effective action in order to solve social issues and stigmas.

3.Advocacy Development: This aspect focuses on creatively conducting events, workshops, videos, and promotional material to raise awareness on certain topics and practices within our society.

HOW DO WE WORK?

Five steps to building community resilience

WATER AND SANITATION

01 Trishna in schools

Project Trishna customizes and implements safe water systems in schools to ensure access to safe water and sanitation for children.

02 Trishna in public spaces

Customizing safe water systems in public spaces such as parks, pavements and landmarks to ensure safe water and sanitation access for pedestrians, street vendor, etc.

03 Trishna in health complexes

Customizing safe water systems in hospitals and clinics to ensure safe water and sanitation access for medical officials, patients and families.

04 Trishna in households

Customizing safe water systems like tubewell, low cost filters for families, specifically in urban poor areas and rural communities

CLIMATE ACTION

Disaster Resilience Programme

- 01** Deploying rapid, effective and efficient aid distribution programs during climate disasters like floods and cyclones, ensuring aid reaches communities which need it the most
- 02** Conducting rehabilitation programs such as home rebuilding, medical camps and farmer support initiatives to ensure communities are able to recover after natural disasters
- 03** Building resilient infrastructure and tools such as climate resilient housing, toilets and portable water filters to empower communities to withstand impact of natural disasters
- 04** Livelihood Resilience for Financial Stability model conducts financial knowledge and income generation initiatives, empowering financial capacity of communities to withstand and recover from natural disasters

CLIMATE ACTION

PROJECT WECan

01 **Domestic Green Tank (DG Tank):** A holistic approach to lower carbon emissions in marginalized areas where the DG Tank will produce biogas for rural household cooking and organic fertilizers for commercial purposes

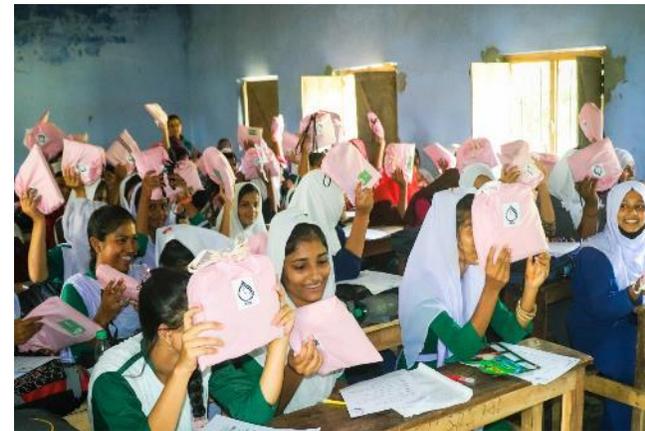

02 **Green Renewable Energy Development (GRED):** GRED conveys the efficiency of solar energy in areas lacking sufficient electrical power lines and consequently installs solar panels in those areas.

PUBLIC HEALTH & HYGIENE

Shushasther Odhikar Shobar

- 01 SOS Medical Box:** This initiative provides customized medical boxes to prevent prevalent diseases in rural households across Bangladesh
- 02 SOS Bijoya Sanitary Pads:** an intervention providing menstrual hygiene management solution that is concerned with improving the safety, privacy, and dignity with which women and girls can live in the marginalized society.
- 03 SOS Energize the Chain:** Improving cold chain infrastructure and management of vaccines and medicine through deployment of ice-line medical refrigerators, remote temperature monitoring devices and power generated through extended cell tower power line or solar in last mile hospitals, clinics and pharmacies

IMPACT: AT A GLANCE

33 Active Districts in Bangladesh

4,12,227 Marginalized people empowered through Footsteps interventions

2,53,761 Empowered with improved access to water and sanitation

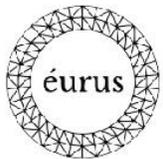

42,188 Empowered with improved public health interventions and services

29,581 Empowered with climate mitigation and adaptation tools and strategies

2000+ Changemakers network across Bangladesh, mobilizing the organization's mission and vision
